Why Are Modern Media Apps So Frustrating?

Modern streaming software has become bloated, ad-ridden, and fragmented across closed ecosystems.

🚫 Unskippable Ads & Commercials

Interrupting your music every 10 minutes and forcing invasive sponsor reads.

🔒 Paywalled Basic Features

Background playback, lyrics, seeking, and offline listening locked behind monthly subscriptions.

🧩 Fragmented Apps & High Memory

Juggling Spotify, YouTube, and pirated movie sites using 2GB+ RAM each.

One Codebase. Two Native Engines.

Over 90% of code is shared across Android and Desktop with zero compromises in audio performance.

📱 MOBILE CLIENT

Android (Media3)

- AndroidX Media3 ExoPlayer
- Foreground Playback Service
- Lock-screen MediaSession
- Material 3 Dynamic Colors
- Min SDK 24 to Android 15

💻 DESKTOP CLIENT

Desktop (libVLC)

- Native VLCJ libVLC C-Bindings
- Gapless Lossless Audio Engine
- Windows, macOS & Linux
- 28-Band Real-Time Visualizer
- Zero-Install Portable Run

⚡ **Compose Multiplatform** powers 100% of the UI across phone, tablet, and PC.

Music & In-App Cinema. All Under One Roof.

One universal library that aggregates streaming platforms into a clean, ad-free station.

🎶 Decoupled Extension SPI

Modular plugin system supporting Spotify, JioSaavn, YouTube Music, SoundCloud, and global radio stations.

🎬 In-App Cinema Studio

Automated Cinemeta IMDb metadata mapping (`tt...`), episode indexing, and fallback stream mirrors.

🛡️ Sandboxed Security Shield

Isolated WebView container that strictly neutralizes popup redirects, ads, and third-party trackers.

Engineered for Audiophiles & Built with AI.

Deep technical capabilities designed for precision, beauty, and convenience.

📊 28-BAND FFT VISUALIZER

Cooley-Tukey Radix-2 FFT Algorithm

Computes mathematical Fast Fourier Transforms directly over raw 512-point audio chunks with Hann windowing across 28 logarithmic frequency bands.

🤖 DUAL AI SPEECH-TO-TEXT

Whisper Large V3 Turbo & Deepgram

Ultra-low-latency voice querying for songs and movies with real-time Voice Activity Detection. 100% ephemeral and private.

100% Free & Open-Source

Nightly is built for the developer and media community. Star the repository, test the release, or contribute!

GITHUB REPOSITORY

github.com/aaweshdas/Audix-Multiplatform-Music-Player

📦 **Android:** Download the verified APK from GitHub Releases

💻 **Desktop:** Portable Windows ZIP (no installer needed)

🛠️ **Source:** Build directly with Gradle & Android Studio
