Why Are Modern Media Apps So Frustrating?

Modern streaming software has become bloated, ad-ridden, and fragmented across closed ecosystems.

🚫 Unskippable Ads & Commercials

Interrupting your music every 10 minutes and forcing invasive sponsor reads.

🔒 Paywalled Basic Features

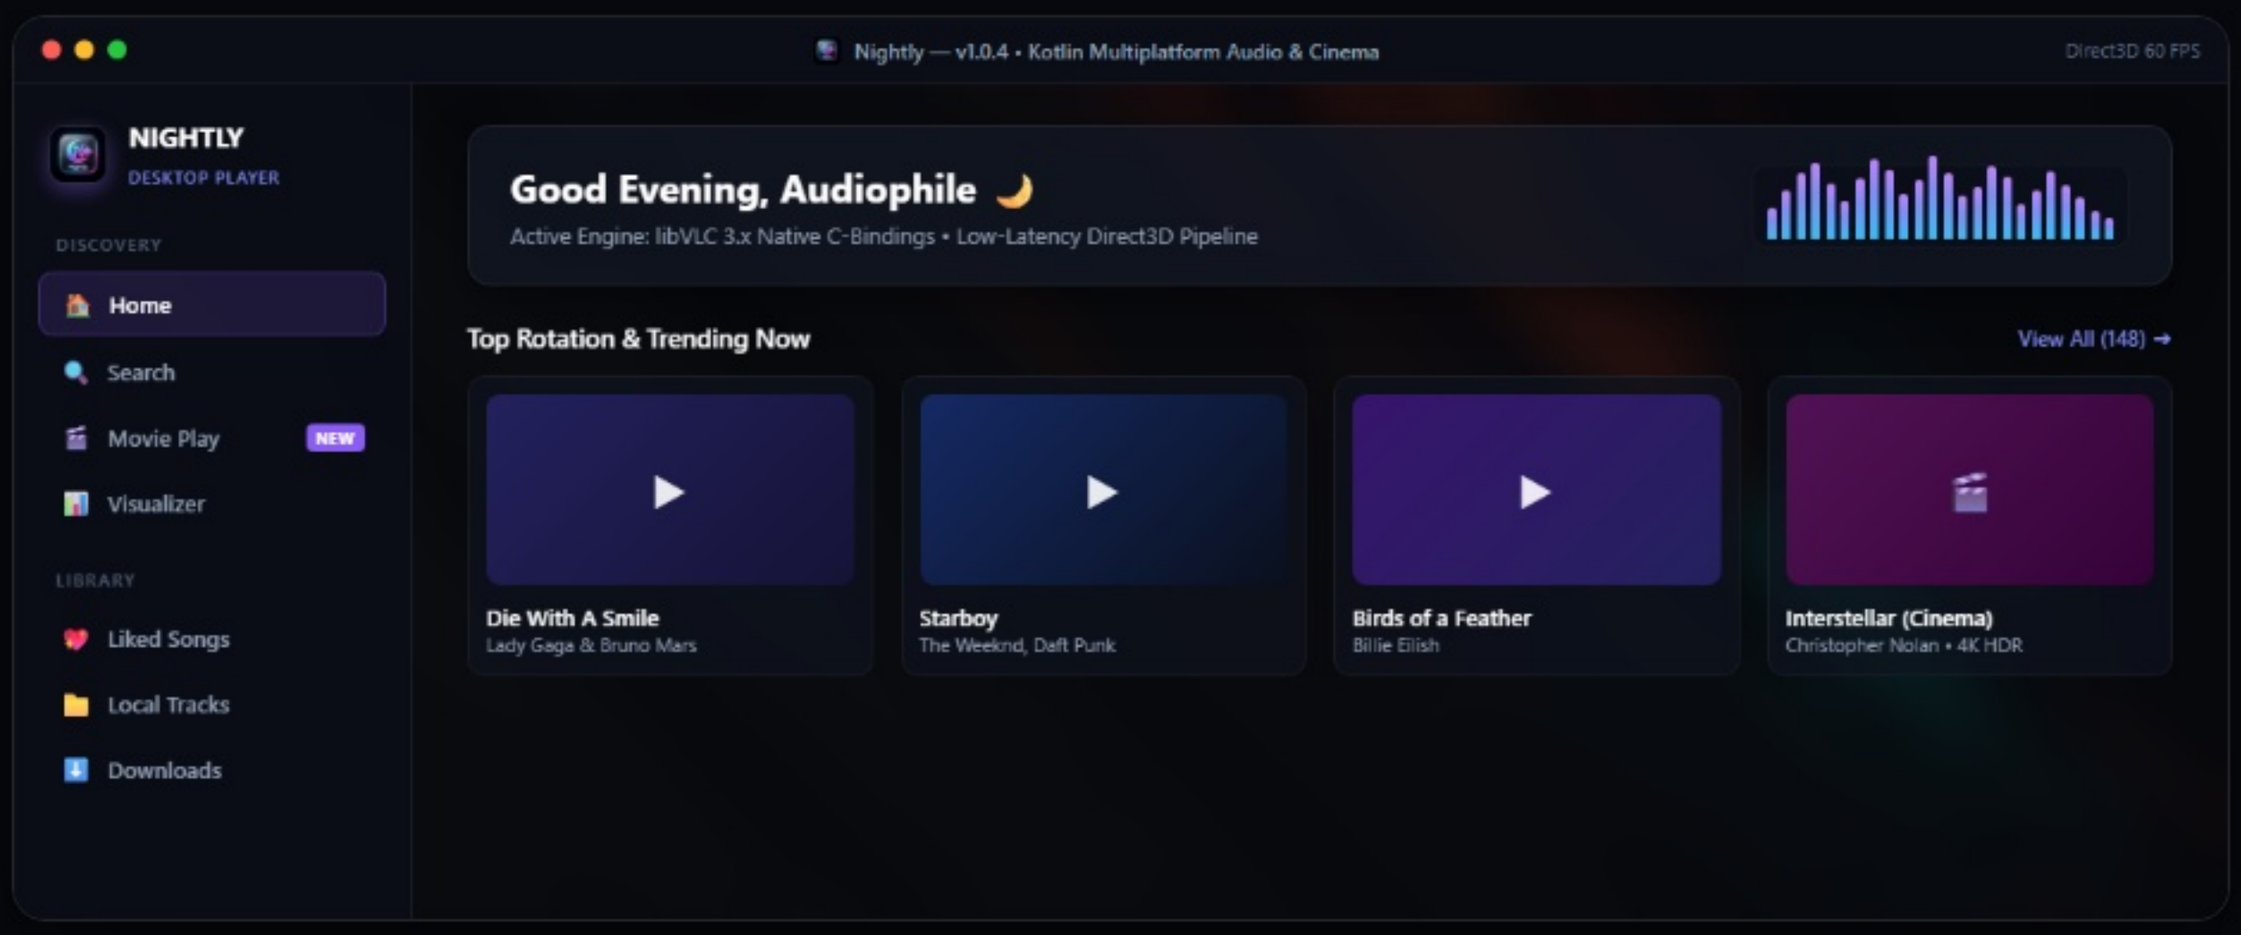

Background playback, lyrics, seeking, and offline listening locked behind monthly subscriptions.

🧩 Fragmented Apps & High Memory

Juggling Spotify, YouTube, and pirated movie sites using 2GB+ RAM each.

One Codebase.
Two Native Engines.

Over 90% of code is shared across Android and Desktop with zero compromises in audio performance.

📱 ANDROID CLIENT

Media3 ExoPlayer

Foreground background service, lock-screen session, and dynamic Material 3 theming.

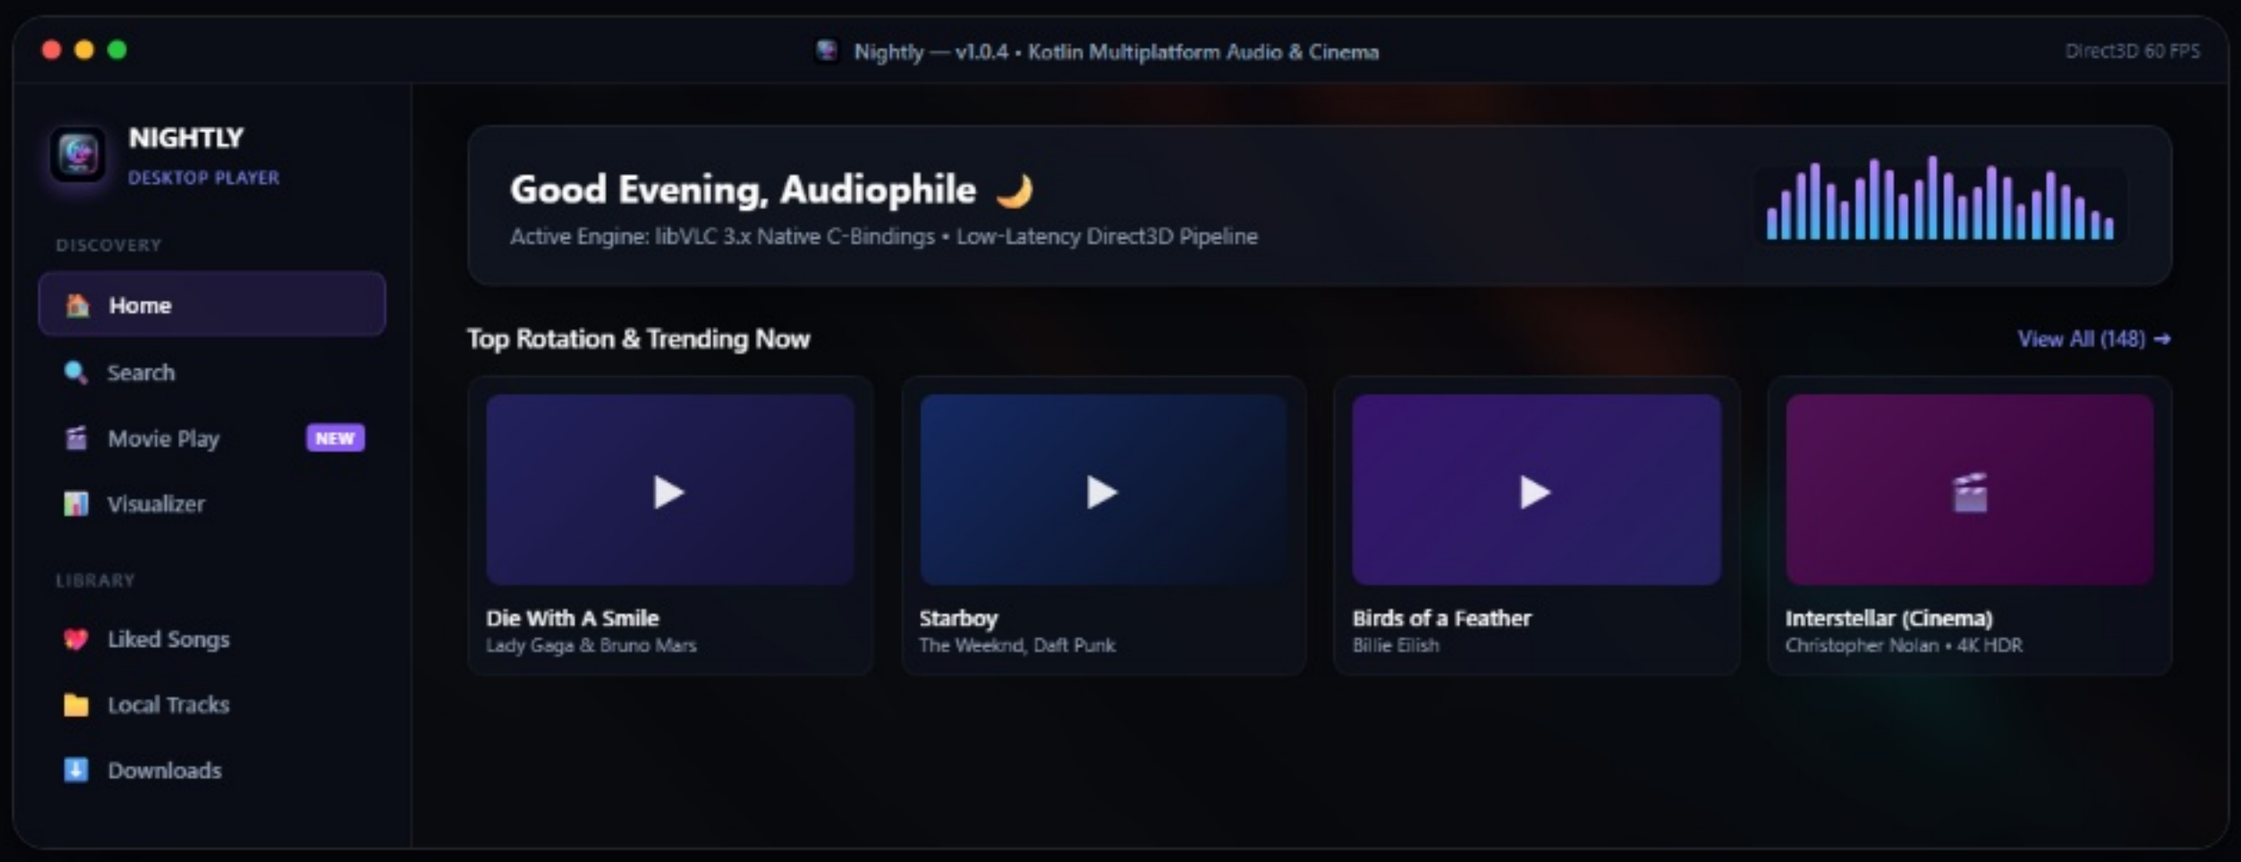

💻 DESKTOP CLIENT

VLCJ Native C-Bindings

Gapless audio, Direct3D 60fps acceleration, 28-band FFT, and standalone portable execution.

Music & In-App Cinema. All Under One Roof.

One universal library that aggregates streaming platforms into a clean, ad-free station.

Decoupled Extension SPI

Modular plugin system supporting Spotify, JioSaavn, YouTube Music, SoundCloud, and global radio.

In-App Cinema Theater & Security Shield

Automated Cinemeta IMDb metadata mapping (`tt...`) inside a strictly popup-shielded container.

Engineered for Audiophiles & Built with AI.

Deep technical capabilities designed for precision, beauty, and convenience.

📊 28-BAND FFT VISUALIZER

Cooley-Tukey Radix-2 FFT Algorithm

Computes mathematical Fast Fourier Transforms directly over raw 512-point audio chunks with Hann windowing across 28 logarithmic frequency bands.

🎙️ DUAL AI SPEECH-TO-TEXT

Whisper Large V3 Turbo & Deepgram

Ultra-low-latency voice querying for songs and movies with real-time Voice Activity Detection. 100% ephemeral and private.

100% Free & Open-Source

Nightly is built for the developer and media community. Star the repository, test the release, or contribute!

GITHUB REPOSITORY

github.com/aaweshdas/Audix-Multiplatform-Music-Player

📦 **Android:** Download the verified APK from GitHub Releases

💻 **Desktop:** Portable Windows ZIP (no installer needed)

🛠️ **Source:** Build directly with Gradle & Android Studio
